- 07 — Future Work + Sprint/Backlog (Slide 14–15)

Run for bright futures

Slide 2

ABOUT PROJECT

- A web-based platform for a nonprofit charity 5K event
- Designed to help users easily register, log in, and manage race participation
- Provides important information such as race details, schedule, and team organization
- Supports both runners and administrators for efficient event management

Run for bright futures

Slide

GROUP – 6

OBJECTIVE

- Create a simple and easy-to-use website for a charity 5K race
- Help users register, log in, and see important race information
- Make the design clear so anyone can use it without confusion
- Provide a smooth and fast experience for all users

Run for bright futures

Slide 4

UI DESIGN PRINCIPLES

Simplicity

The design is clean and not crowded, so users can focus on what they need.

Usability

The website is easy to use, and users can complete tasks quickly.

Clear Navigation

A top menu helps users move between pages like Home, Login, and Dashboard.

Consistency

All pages use the same layout, colors, and buttons for a smooth experience.

HOMEPAGE

Clean Layout

The homepage is simple and well organized with clear sections, making it easy to read and understand.

Race Information Visible

Important details like the race date, location, time, and schedule are shown clearly on the page.

Call-to-Action Buttons

Buttons like “Register Now” and “Runner Login” help users quickly take action.

Navigation Bar

The top menu allows users to easily move between pages like Home, Login, Register, and Dashboard.

Run for Bright Futures

A fictitious nonprofit raising money for children's education and after-school programs.

Sample Runner

Daniel

Race Day Checklist

- Bring a photo ID.
- Arrive early for check-in.
- Keep your emergency contact current.
- Review the race schedule before race day.

Schedule

7:00 AM

Event

Registered runners can check in and pick up race materials.

8:00 AM

Event

Group stretching and race reminders.

8:30 AM

Event

The 5K begins at the park entrance.

9:30 AM

Event

Water, fruit, and snacks available near the finish area.

10:00 AM

Event

Thank-you message and charity update from organizers.

DASHBOARD PAGE

User Information

Displays personal details such as name, email, team, and status, so users can easily view their profile.

Team Section

Shows team members, allowing users to see who they are grouped with for the race.

Race Day Checklist

Provides important reminders like bringing ID and arriving early.

Shedule Section

Displays the full race day timeline so users know exactly what to expect.

LOGIN PAGE

Authentication

This page allows users to securely log in and access their personal dashboard.

Email + Password Input

Users enter their registered email and password to sign in.

Error Handling

If the user enters the wrong email or password, an error message will appear and prevent login.

User-Friendly Features

The “Show password” option helps users check their input and avoid mistakes.

Navigation Support

A “Need an account?” button allows new users to quickly go to the registration page.

[Home](#)[Login](#)[Register](#)[Dashboard](#)[Admin](#)
[Logout](#)

Register for the 5K

Enter your runner information below. Team name is optional, and the emergency phone helps race staff respond quickly if needed.

Name	Email
Jordan Lee	runner@example.com
Age	Emergency Phone
21	843-555-1234
Password	Team Name (optional)
At least 6 characters	Fast Feet

☐ Show password

[Create Account](#)[Back to Home](#)

REGISTRATION PAGE

Form Validation

The form checks user input, such as making sure the password has enough characters and required fields are filled.

Required vs Optional Fields

Important fields like name, email, age, and password are required, while team name is optional.

User Input Structure

The form is organized in a clear layout with labeled input boxes, making it easy for users to enter their information.

User-Friendly Features

Options like “Show password” help users avoid mistakes when typing.

ADMIN PANEL

Table Layout

The page shows a table with columns like ID, name, email, age, team, and admin status, making the data easy to read.

Admin Control

Admin users can view all registered runners and manage the event more easily.

Data Visibility

All user information is shown clearly in one place, so admins can quickly understand and organize the data.

INTERACTIONS + SYSTEM BEHAVIOR

Page Navigation

- Clicking buttons like Home, Login, Register, and Dashboard moves the user to different pages.

Form Submission

- When users fill out forms and click submit, their information is saved and processed by the system.

Login Process

- The system checks the user's email and password to make sure they are correct before allowing access.

Dashboard Loading

- After login, the dashboard shows user-specific data like name, team, and schedule.

System Communication

- The frontend interacts with backend logic

  Run for bright futures

ERROR HANDLING

Wrong Password

If the password is wrong, the system shows an error message and asks the user to try again.

Could not connect to the backend for login.

Runner Login

Use the email and password you registered with to access your dashboard.

Email

admin@example.com

Register for the 5K

Enter your runner information below. Team name is optional, and the emergency phone helps race staff respond quickly if needed.

Name	Email
Jordan Lee	admin@example.com
Please enter your full name.	
Age	Emergency Phone
21	843-555-1234
Please enter your age.	Please enter an emergency phone number.

Missing Fields

If some boxes are empty, the system shows a warning and tells the user to fill them in.

Duplicate Email

If the email is already used, the system will not allow it and asks the user to use a different email.

COMMUNICATION + CONCLUSION

Communication

- Used **GitHub** to share code and track changes
- Used **iMessage** for quick updates and coordination
- Used **Discord** for team discussions and problem solving
- Communicated every Sunday to stay on schedule

Conclusion

- Built a working charity 5K website
- Users can register, log in, and view race details
- Admin can view and manage users
- System is simple, clear, and easy to use

FUTURE WORK & SPRINT PLAN

Sprint's Goal: Build backend system and improve login security + overall project					Start Date:	3/30/2026	Work Done per day per task [Hours]																
User Story	Time (est)	Time (spent)	Time (left)	Task	Time (est)	Who's working	Status	3/30	3/31	4/1	4/2	4/3	4/4	4/5	4/6	4/7	4/8	4/9	4/10	4/11	4/12		
Backend Integration	14	14	11	Set up basic backend (server)	3	Daniel Howard	TODO	1															
				Connect frontend to backend	2	Bryce Batey	TODO																
				Create user database table	2	Ponpawit Potisom	TODO	1															
				Save user registration data	3	Daniel Howard	TODO																
				Load user data for dashboard	2	Bryce Batey	TODO	1															
				Test backend connection and fix bugs	2	Ponpawit Potisom	TODO																
Secure Login System	9	9	9	Improve login authentication logic	2	Ponpawit Potisom	TODO																
				Show error messages for wrong login	4	Bryce Batey	TODO																
				Protect admin access	3	Daniel Howard	TODO																
Admin Panel Improvements	10	10	10	Connect admin panel to backend	3	Daniel Howard	TODO																
				Add search users feature	3	Bryce Batey	TODO																
				Add edit user option	2	Daniel Howard	TODO																
				Improve table performance	2	Ponpawit Potisom	TODO																
TOTAL	33	33	30					3	0	0	0	0	0	0	0	0	0	0	0	0	0	0	0
Daily burnout	33	100.00%						0	0	0	0	0	0	0	0	0	0	0	0	0	0	0	0
Total time left (from estimate)						Estimate	33	33	33	33	33	33	33	33	33	33	33	33	33	33	33	33	33
Total time left (from spent)						Burnout	33	30	30	30	30	30	30	30	30	30	30	30	30	30	30	30	30
Complexity (story points)	31																						
Sprint Burndown																							
+ ≡ Sprint Backlog (weeks 3-4) Sprint Backlog (weeks 5-6) Sprint Backlog (weeks 7-8) Sprint Backlog (weeks 9-10) Team members Task status																							

Weeks 7–8

- Set up and improve backend system
- Connect frontend with backend
- Improve login authentication and security
- Add admin panel backend connection
- Test backend and fix bugs

FUTURE WORK & SPRINT PLAN

Sprint's Goal: Improve backend, make login more secure, and fix UI issues						Start Date: 4/13/2026		Work Done per day per task [Hours]															
User Story	Time (est)	Time (spent)	Time (left)	Task	Time (est)	Who's working	Status	4/13	4/14	4/15	4/16	4/17	4/18	4/19	4/20	4/21	4/22	4/23	4/24	4/25	4/26		
Backend Improvements	16	16	16	Improve database structure	3	Daniel Howard	TODO																
				Optimize data loading	3	Bryce Batey	TODO																
				Improve backend routes	3	Ponpawit Potisom	TODO																
				Fix backend bugs	2	Daniel Howard	TODO																
				Test backend performance	3	Bryce Batey	TODO																
				Add color styling to improve UI design	2	Ponpawit Potisom	TODO																
Security Improvements	7	7	7	Improve password security	2	Ponpawit Potisom	TODO																
				Improve login	3	Bryce Batey	TODO																
				Test login system	2	Daniel Howard	TODO																
UI & UX Improvements	11	11	11	Improve navigation flow	3	Daniel Howard	TODO																
				Improve button and form design	3	Bryce Batey	TODO																
				Make pages more consistent	3	Daniel Howard	TODO																
				Test user experience	2	Ponpawit Potisom	TODO																
TOTAL	34	34	34					0	0	0	0	0	0	0	0	0	0	0	0	0	0		
Daily burnout	34	100.00%						0	0	0	0	0	0	0	0	0	0	0	0	0	0		
Total time left (from estimate)						Estimate	34	34	34	34	34	34	34	34	34	34	34	34	34	34	34		
Total time left (from spent)						Burnout	34	34	34	34	34	34	34	34	34	34	34	34	34	34	34		
Complexity (story points)	31																						
Sprint Burndown																							
+ ≡ Sprint Backlog (weeks 3-4) ▾ Sprint Backlog (weeks 5-6) ▾ Sprint Backlog (weeks 7-8) ▾ Sprint Backlog (weeks 9-10) ▾ Team members ▾ Task status ▾																							

Weeks 9–10

- Improve database performance and structure
- Fix UI issues and improve navigation
- Add color styling to enhance design
- Improve forms and buttons consistency
- Test user experience and finalize system
